

Monsoon Rain, 2022

District Khairpur

# The Situation Report

## The Situation

Khairpur Calamity Hit Area During the third Monsoon Spell its near to be declared a calamity hit area given the damage caused to various vacillation by the recent monsoon rains because rains have damaged up to 50% of date orchards in Khairpur district.

Furthermore, the recent monsoon rains from 17th July to date have caused a loss of Rs 5 billion to the dates growers.

## Agri-Crops

### Damages Situation

KHARIF crops in Khairpur have been seriously damaged by the current monsoon rains. The downpour, starting from the second week of July 2022 and still continuing, has engulfed more and more areas in rural areas and rains have multiplied the miseries of the farmers.

Damages to cotton, paddy, sugarcane and vegetables are enormous. Initially the rains spelt disaster in rural areas.

## Dates Orchards Damages Situation

Due to heavy rain, the dates are heavily damaged and in the rural areas of all talukas, hundreds of acres of agricultural land and dates orchards were submerged in water due to rain. While major crops have generally benefited from the monsoon season, the date crop has reportedly been hit by rains in Khairpur.

According to some estimates by market dealers and growers, 60-75pc of the crop was affected in the third week of July, when the crop was ready for harvesting. The rains normally come by the end of August, when harvesting is over.

The rains continued for around 10 days, damaging the quality of otherwise healthy dates. Last year too, the crop had been hit by fungus due to extended cold weather. The heavy rains also discoloured the dates in the water-flooded fields. The damaged dates fetch lower prices and are normally sold through middlemen. Only 5-10pc of the orchard owners who have the holding capacity are able to sell their crop when the prices rise due to inadequate supply.

# 50 VILLAGES

## DAM & PROTECTION BANDH BREACH DEVASTATION

## LOCAL DAM & LOCAL PROTECTION BANDH BREACH KOTDIJI

Taluka Kotdiji- Village Ali Abad Near Ubhan Shah Naara Road Kotdiji, Khairpur A wide breach occurred in locally constructed dam due to storage of water, over capacity breach occurred due to intense water pressure in the tributary inundating 300 acres of land and water continued to flow towards the village. Local Villagers on self-Initiatives plugging the breach with local ways

## 1500 HOUSES DROWNED

UC NASER FAKIR JALALNI,  
TALKA KOTDIJ, BREACH  
AFFECTED 50, بند, PROTECTION  
VILLAGES WITH MORE THAN  
1500 HHS

**95 HOUSES  
DEMOLISHED**

LOCAL DAM DEVASTATION  
COMPLETE AFFECTED 20  
PARTIALLY AFFECTED 75

## PPRP INTERVENTIONS AFFECTED

### LOW COST HOUSES DAMAGES

Kingri 09, Khairpur 13  
Kotdiji 16, Nara 08  
Thari Mirwah 06  
Faiz Ganj 17  
Gambat 04  
Sobhdero 06

### BUSINESS DEVELOPMENT GROUPS
